

Well Hand over Program at Vandre Village

TERRE Policy Centre in collaboration with 100 Pipers Music CDs constructed a well (size 25 feet X 25 feet) at Vandre village in Pune District. Vandre village was facing water scarcity because of the geographical reasons. Vandre is a rain fed region of the Sahayadris and since it is located on the steep slopes of the Sahayadris, the water run-off rate in this region is high and storage of the rainwater is difficult. The well con-

struction was started on 5th June 2016. On 25th January, TERRE Policy Centre handed over the well which will be serving more than 250 villagers and more than 400

pets. The newly constructed well is also reducing the women's efforts as now they don't have to roam all over the area searching for the water. Also, it will be helpful for the villagers to increase their pets as previously it was impossible because of the water scarcity issues. It will help to increase their economic level by increasing the productivity through poultries and dairies.

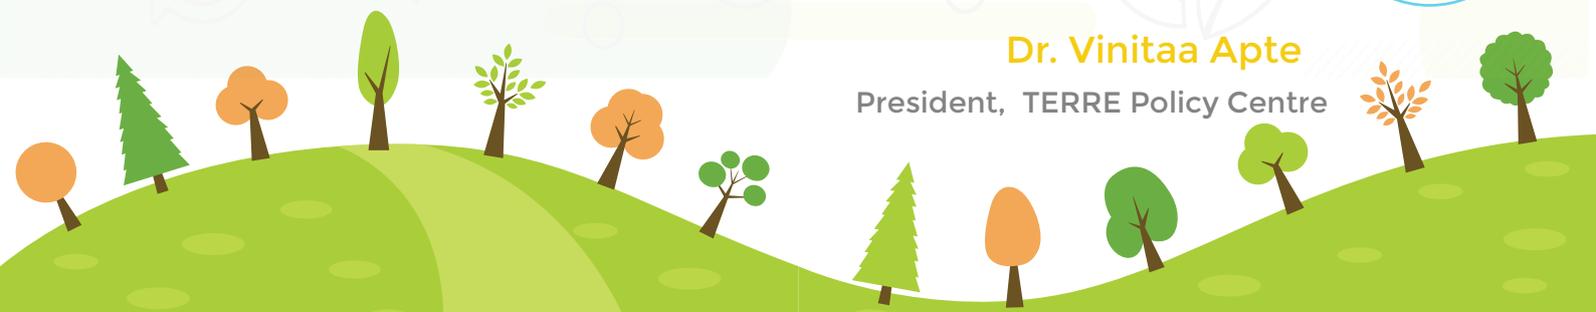

President corner

“ Celebrate the valentine day by giving plants to your valentine instead red roses. Plants will give a new life to ‘The Earth’, which is our first valentine

Dr. Vinitaa Apte

President, TERRE Policy Centre

QUESTION OF THE MONTH

Importance of Urban Forestry

A great start for New Year by an interactive session organized by TERRE Policy Centre, on the topic 'Importance of Urban Forestry' on 7th January 2017 at 'Smritivan', Warje, Pune. Initially, Dr. Vinitaa Apte, President, TERRE Policy Centre, unfolded the idea behind the concept of Urban Forestry. Mr. Mahesh Bhavsar, ACF, Forest Dept. - Pune was the speaker for the program.

Warje Urban Forestry area, once a barren waste land now has developed into forestry through the efforts of TERRE Policy Centre in collaboration with Forest

department. This session was organized to interact with the natives of Warje area regarding the concept behind the Urban Forestry Development and its importance.

Many people from nearby area often come there for walk. They also shared their experience before and after plantation. The interactive session was conducted successfully and TERRE received huge response and appreciation from the local and nearby community.

Purple Moorhen

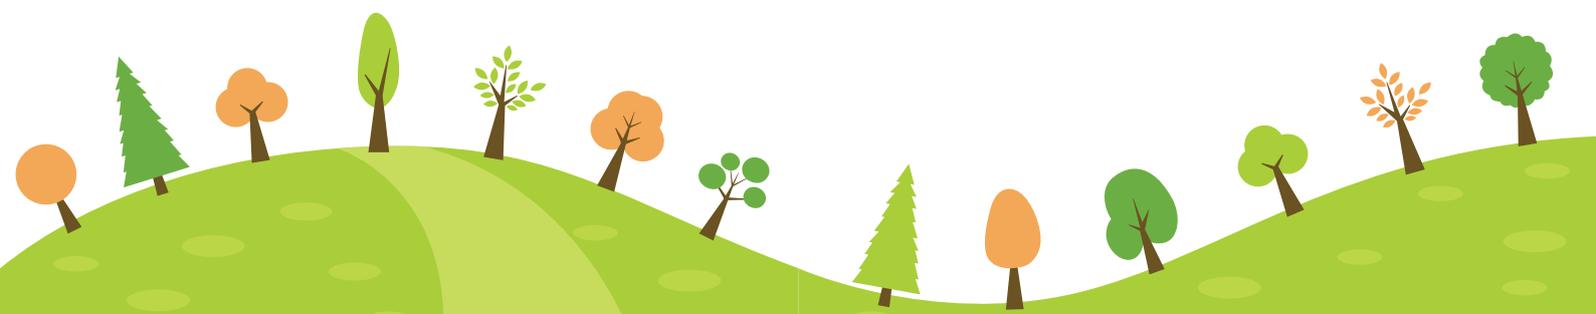

PC : Mr. Milind Halbe, Satara

The western swamphen (Porphyrio porphyrio) is a "swamp hen" in the rail family Rallidae. From its French name talève sultane, it is also known as the sultana bird.

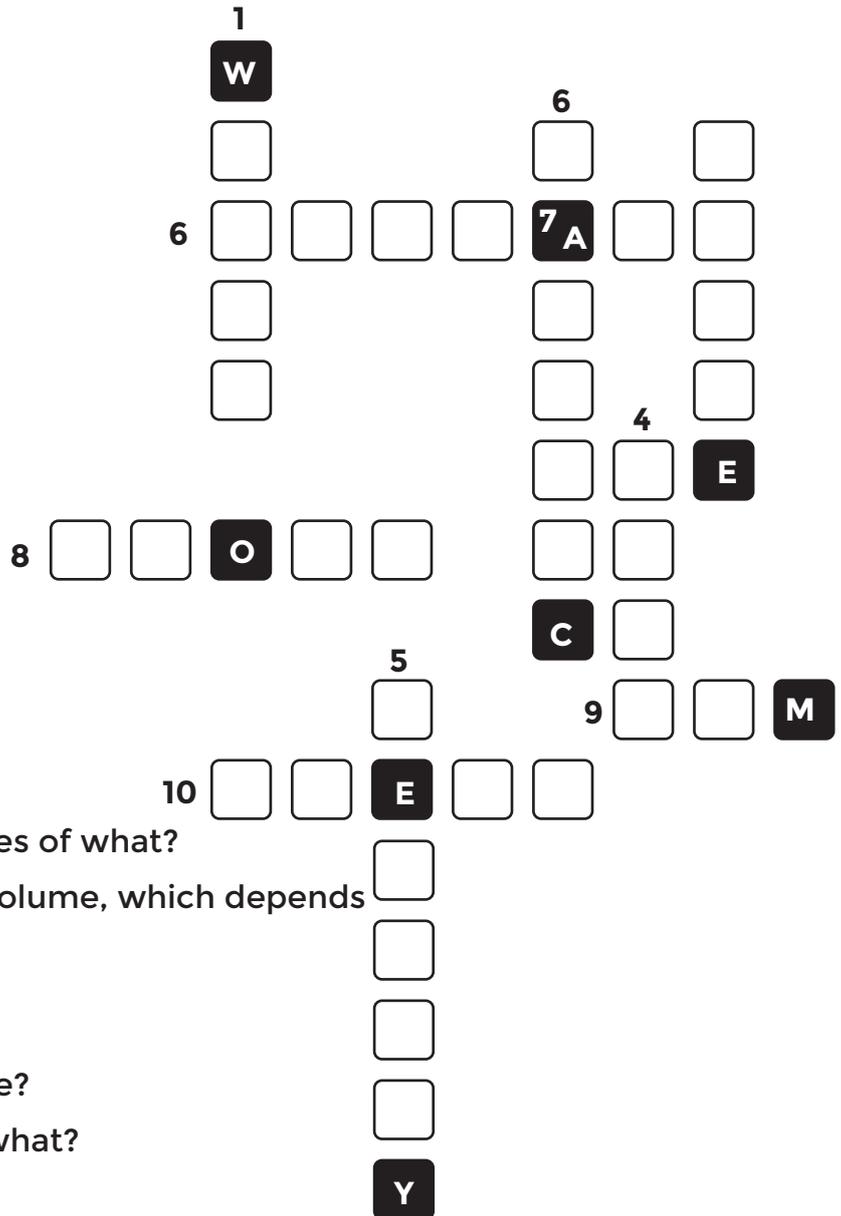

This chicken-sized bird, with its large feet, bright plumage and red bill and frontal shield is easily recognizable in its native range.

It used to be considered the nominate subspecies of the purple swamphen. It is found in Iberia, France, Sardinia and North Africa to Tunisia.
